A terminal takes off! The first event location with its own airport!

Salzburg on the fast lane! All started with the Red Bull project Hangar-7 in August 2003, which set new scales in the event business into motion. And still the innovation does not stop as Salzburg Airport offers as well a new unique event location with the beginning of May 2005.

The story began in the year 2003 as the management of Salzburg Airport decided to build a new terminal in order to expand the capacity for passenger comfort, which was short in the winter season caused by the new security standards on all airports. A high utilization by passengers was not guaranteed since the terminal would have been needed only in the winter season. Then the idea for an alternative use as an event location came up. Et voilà, the project amadeus terminal 2 was born!

The amadeus terminal 2 is situated in the heart of Austria and therefore is perfect for all kinds of national and international events. The unique atmosphere of Salzburg and its mountain area combined with the international flair of an airport make this event location even more jutting.

A maximum of 1500 people and various technical facilities make up a perfect enrichment for the MICE market. Check-in at amadeus terminal 2 and experience the art to land a special event!
